

Product Name :
Chlor PH-Test Dip and Read Strips and PAC-100

Product Code :
NTH0032

Description :

Chlor PH-Test Dip and Read Strips and PAC-100

Technical Specification :

Low range Chlorine 2-in-1 Rapid Test Strips for simultaneous testing of both Free Chlorine and pH in Drinking Water. Simple Dip-and-Read procedure for results in seconds.

For testing of Free Chlorine (0-10ppm) and pH (6.0-9.0).

Free Chlorine: 0.0, 0.1, 0.25, 0.5, 1.0, 3.0, 6.0, 10.0ppm

pH: 6.0, 6.4, 6.8, 7.2, 7.6, 7.8, 8.2, 9.0

This test strip technology is TMB (Tetramethyl Benzidine) based.

It shows equivalent results to DPD comparison technologies being drinking water compliant.

The range of the free chlorine test pad allows both low and high levels of chlorine to be monitored.

The indicator for pH is Bromothymol Blue pH, having easy to read blue colors.

Test procedure: Dip one strip in the water for 10 seconds with a gentle back and forth motion.

Remove the strip, shake once, briskly, to remove excess water and wait about 10 seconds.

Then match pH and free chlorine results with the supplied color chart.

The Kit includes 100 test strips contained in a water and humidity tight bottle/container, including instructions for use and storage.
