

Product Name :
Incubator Portable

Product Code :
NTH0033

Description :

Incubator Portable

Technical Specification :

Incubator, Portable, for use with Microbiological Field Testing.

Capacity: approximately 0.8 to 1.5 litres of useable chamber size

Temperature Range from Ambient plus: 5 to 45 degrees C +/- 0.5 degrees C

Total weight: 1.2kg (approx.)

Capacity app. 1.0 litre. Clear lid.

Supplied with separate 12V vehicle and 240V mains adaptors.

Portable mini-incubator incorporated in a robust moulded carrying case, with transparent polycarbonate cover.

Power: The incubator runs on 12 Volts DC from the mains adaptor or from a vehicle 12V cigar lighter cable.

Universal power supply will have automatic voltage selection/range (110/240 Volts) and be supplied with interchangeable worldwide mains power plugs w/adaptor.

Solid state temperature control technology and isolated heat reservoir chassis for thermal inertia and heat distribution without any fans or moving parts.
