

Product Name :
Bacteria Testing E-Coli

Product Code :
NTH0038

Description :

Bacteria Testing E-Coli

Technical Specification :

Compact Dry E. coli Count is a Direct Culture based ready-to-use test method for Rapid Enumeration of Escherichia coli and coliform bacteria.

The plates are pre-sterilized, contain culture medium and a cold water-soluble gelling agent

The medium should be rehydrated with 1mL diluted sample inoculated onto the center of the self-diffusible medium, allowing the solution to diffuse by capillary action.

The plate can be incubated at 35[degrees]C for 20-24h and the colonies counted without any further working steps.

Medium contains 2 kinds of chromogenic enzyme substrates (Magenta-GAL and X-GLUC) that develop red/pink color for Coliform and white/blue color for E.coli.

Storage: Keep at room temperature (1-30 degrees C). Refrigerated storage is not required
