

Product Name :
Reagent Reservoir

Product Code :
GLAS-PLST0004

Description :

Reagent Reservoir

Technical Specification :

volume processed

With pour-off spout

Non sterile

Material: polypropylene

Volume graduation, per 5ml embossed on the inside

Capacity: approximate 60ml

Wide base ensures optimal stability

Reusable, autoclavable

Reservoir for short-time containment of reagent and chemicals

Accommodates multichannel pipettes to 8 and 12 channels

Trough profile maximizes amount of liquid accessible, even with small
