

Product Name :
Vacuum Filter Stand Support

Product Code :
WATER-SAN0009

Description :

Vacuum Filter Stand Support

Technical Specification :

Self-standing, stainless Steel 1-place Manifold.

Self-standing single funnel and membrane support/stand for use with vacuum filtration of water samples in the context of microbiological field water testing.

The Manifold/Stand is made from stainless steel and is equipped with one/single place for holding cup/funnel and membrane.

The support will have an outlet connection to allow membrane filtration by vacuum.
