

Product Name :
Multi or Single Jet Water Meter**Product Code :**
WATER-SAN0044**Description :**

Multi or Single Jet Water Meter

Technical Specification :

Multi-jet or single-jet type water meter suitable for horizontal and/or vertical installations.

Testing pressure 20 bars.

Testing temperature 50°C.

Nominal bore diameter 13 mm (½ inch).

Maximum working pressure 10 bars.

Maximum operating water temperature 40°C.

The totaliser mechanism is on-site-interchangeable.

An internal adequate filter (strainer) is fixed on the inflow side.

Smallest readable unit 0.1 litres.

Transitional flow rate $Q_t = 120$ litres/hour.

Accuracy between maximum and transitional flow (+ 2%).

Accuracy between minimum and transitional flow (+ 5%).

Maximum register reading 99 999 cubic meters.

Nominal flow rate $Q_n = 1.5$ cubic meters / hour.

Maximum flow rate $Q_{max} = 3$ cubic meters / hour.

Minimum flow rate $Q_{min} = 30$ litres / hour.

The water meter employs statically and hydro-dynamically balanced rotor, offering the minimum possible interruption to flow.

Magnetic direct drive, extra dry, easy-to-read dials and register with an anti-fogging glass and leak detection star.

The register has a metallic (or plastic) housing with cover, and may be rotated through 360 degrees with a stop at the selected angle.

The body of the meter is metallic, made of a corrosion resistant material, coated with epoxy coating on the interior and the exterior faces.
