

Product Name :
Suction Pump Foot Operated**Product Code :**
MED-DEV0031**Description :**

Suction Pump Foot Operated

Technical Specification :

High performance, high quality, single piston portable foot-operated suction pump

For pharyngeal and tracheal aspiration, and other minor medical procedures

Integrated spring, returns the pedal to its initial ready-to-use position

Lever minimizes pedal force required to reach maximum flow

Piston, with diaphragm valve, is sealed with removable elastic O-ring

Pedal movement generates suction every time it's depressed

Vacuum, maximum: - 70 kPa (ca. - 700 mbar)

Basic essential design without manometer

Air-flow, maximum: 30 to 40 L/min

Collection capacity container: 900-1100 ml

Container is transparent, allowing assessing collected volume

Operating temperature range: -20 C to +50 C

All parts can be autoclaved at 121 C

Wide opening at the top of the container allows for easy and thorough cleaning

The suction pump set can be entirely disassembled, facilitating proper cleaning and disinfection

For operator's comfort, pedal should support at least 20 cm of the foot, and distal-end displace maximum 9-11 cm

Large stable base is entirely fit with anti-slip, preventing the pump from gliding-away while in use
