

**Product Name :**  
Power Supply Eht**Product Code :**  
ALABS-A85-168**Description :****Power Supply Eht**

The unit provides a continuously variable E.H.T. output from 0 to 5 kV d.c. with a low voltage output of 6.3 volt d.c. and is ideal for vacuum tubes etc. This unit uses a low voltage transistor inverter circuit and E.H.T. transformer. The high a.c. voltage is rectified and smoothened. A meter calibrated 0 to 5 kV is connected to control the output voltage.
