

Product Name :

Kelvin Bridge

Product Code :

ALABS-A85-178

**Description :****Kelvin Bridge**

For precision measurement of low resistances, range 10^{-4} to 1 ohm. With a rotary dial having ten coils of 0.1 ohm each and a circular slide wire resistance reading in steps of 0.001 ohm. A multiplier of 0.1 enables readings upto 0.0001 ohm. Separate current & potential terminals are provided. Properly aged manganin coils are used. Accuracy $\pm 0.1\%$ or $\pm 0.2\%$ of the slide wire length whichever is greater.
