

Product Name :
Laminar Air Flow Hanging Mode**Product Code :**
ALABS-A89-220**Description :****Laminar Air Flow Hanging Mode**

For some applications it may not be ideal to use either a horizontal laminar flow hood or a vertical. For example, where an operator has to work on Ceiling / Filling machine . This simple and portable unit produces a unidirectional flow. A bacteria free air space at an inclination over the work area. It is specially designed to minimize the risk of transferred contamination. the unit is self supported from the floor and totally isolated from the Ceiling / Filling machine. Rest of the features are same as of LAMINAR
