

Product Name :
Portable Rockwell Hardness Tester**Product Code :**
ALABS-A105-010**Description :****Portable Rockwell Hardness Tester**

Our clients can avail from us an entire quality assured range of Portable Hardness Testing Machines that find wide applications in test parts where bench type hardness tester model is not useful. Light in weight, these hardness testing machines are used for product testing of crank shafts, cylinder blocks, liner and assemblies and are also handy for inside and outside of surface testing of pipes, bushings, ball bearing rings or other complicated parts. Used in any direction without affecting the accuracy, these testing machines exhibit various salient features. One of the features includes a maximum test height x throat capacity of 110 x 55 mm. Its Rockwell hardness scales such as HRA, HRB and HRC are obtained by using different types of indentors namely Diamond or Ball.
