

Product Name :
Portable Jib Crane**Product Code :**
ALABS-A57-010**Description :**

Portable Jib Crane We are engaged in manufacturing a range of jib crane that is designed and developed using latest technology and quality components. These Jib Cranes have a rotating boom to a mast and ceiling mounting. The rotating boom is held in a vertical position by floor and the ceiling mounting by wall bracket mounting. Jib crane stands for superior quality product. They are an important part of any material handling system. They help reduce labor cost by avoiding the time lost on waiting for an overhead crane or fork lift. A Jib crane can be easily handled by one person and is very cost-effective. By combining lightweight construction techniques we have developed a Jib crane that is not only lightweight but produces minimum amount of friction thus reducing operator fatigue and wear and tear.
