

**Product Name :**

Kelvin Bridge

**Product Code :**

ALABS-A137-034

**Description :****Kelvin Bridge**

For precision measurement of low resistances, range  $10^{-4}$  to 1 ohm. With a rotary dial having ten coils of 0.1 ohm each and a circular slide wire resistance reading in steps of 0.001 ohm. A multiplier of 0.1 enables readings upto 0.0001 ohm. Separate current & potential terminals are provided. Properly aged manganin coils are used. Accuracy  $\pm 0.1\%$  or  $\pm 0.2\%$  of the slide wire length whichever is greater.
