

Product Name :
Heat Transfer In Natural Convection**Product Code :**
ALABS-A143-027**Description :**

Heat Transfer In Natural Convection

Technical Specification :

Heat Transfer In Natural Convection

The setup consists of a brass tube fitted in a rectangular duct in a vertical position.

The duct is open at the top and bottom, and forms an enclosure that serves the purpose of undisturbed surrounding.

One side of the duct is fitted with a transparent acrylic window for visualization.

An electric heating element is kept in the vertical tube that in turns heats the tube surface.

The heat is lost from the tube to the surrounding air by natural convection.

The temperature of the vertical tube is measure by temperature sensors and displayed by a Digital Temperature Indicator with multi channel switch.

The heat input to the heater is measured by a Digital Ammeter and a Digital Voltmeter and is varied by a variac. The tube surface is polished to minimize the radiation losses.

Experimentation:

To determine average heat transfer coefficient under natural convection

Utilities required:

Electricity Supply : 1 Phase, 220 V AC, 2 Amp.

Table for set-up support

Technical Specifications:

Diameter: 38 mm (approx)

Length: 500 mm (approx)

Heater: Nichrome Wire

Digital Voltmeter: 0-300 Volt

Digital Ammeter: 0-2 Amp

Variac: 0-230 V, 2 Amp

Digital Temp.Indicator: 0-3000C, with multi-channel switch

Temperature Sensors: RTD PT-100 type

Instruction Manual: An english instruction manual will be provided along with the Apparatus
