

**Product Name :**  
Automotive Diesel Engine**Product Code :**  
ALABS-A151-003**Description :****Automotive Diesel Engine**

- A 4-cylinder, water cooled, Bio diesel compatible, 1.9 litre Volkswagen diesel engine, complete with services and ancillaries required to run the engine in a laboratory environment
- Variable load eddy current dynamometer which acts as a brake, allowing direct measurement of engine torque.
- Supported on strong steel framework via flexible mounts. The frame also houses the fuel tank, battery and electrical enclosures.
- Protected by guards around the moving parts. Safety interlocks and emergency stops are provided.
- Supplied with the engine manufacturer's diagnostic software.
- Starter, throttle and dynamometer can be controlled from a computer
- Standard instrumentation includes sensors for:

- Engine speed

- Torque
  - Air flow
  - Cooling water temperature (inlet and outlet of heat exchanger)
  - Cooling water flow
- 
- Optional engine indicator set for measuring cylinder pressure through the cycle

**Features:**

- 4-cylinder (Biodiesel Compatible) automotive engine
- Eddy current dynamometer to vary engine load
- Plotting of characteristic torque and power curves against engine speed
- Full software control of system, including load and throttle settings
- Closed loop software control of brake loading to maintain constant engine speed during measurements
- Secondary water cooling by heat exchanger, with measurement of temperature change and flow rate
- Engine manufacturer's diagnostic software (displays fuel injection characteristics)
- Remote emergency stop, and facility for safety interlocks
- Optional measurement of cylinder pressure, and displaying this on a p-v diagram
