

**Product Name :**  
Heating Mantle**Product Code :**  
ALABS-A152-007**Description :****Heating Mantles**

Heating mantles designed to meet the highest electrical standards. The flexible mantle is suspended above a thermal insulating 'Former' which provides maximum heat transfer coupled with minimum risk of flask breakage. The outer housing is constructed from aluminium metal, finished with heat and mar resistance epoxy polyester paint, which is conjunct the insulation. To ensure a safe, lower outer case temperature. All mantles have indicator lights temperature control regulator and a cord.
