

Product Name :
Clean Air System Exporter**Product Code :**
ALABS-A20-001**Description :****Clean Air System Exporter**

Clean Room Air Shower is a chamber where a personnel decontaminates himself before entering clean room. Made using advanced technologies, these chambers cleanses the dust and air borne particles to minimize the contamination of the devices and other products like biological samples in the clean room. We make sure that each of the Air Shower Cabinet that we design and develop is in compliance with the market norms and standard grade thus efficiently serve the purpose of the customers. Our aim is to provide ultimate clean room solutions at competitive prices. Hence, we guarantee the quality of Air Shower System offered by us.

We have used extremely advanced and latest HEPA Filters to extract particles larger than 0.3 micrometers in size. A wide variety of designs are developed by us such as single-side shower, double-side shower, three-side shower, and others as per the requirement of the customers. Our Air Shower System meet the requirement of close to sterile condition in cleanroom through blasting dirt and dust particles.
