

Product Name :
Rotap Sieve Shaker**Product Code :**
ALABS-A162-003**Description :****Rotap Sieve Shaker**

The rotap sieve shaker reproduces the circular and tapping motion given to test sieves in hand sieving. The uniform, mechanical action ensures accurate and dependable test.

Using the regular height 20-cm diameter sieves, one sample can be tested on a series of six sieves of different openings, all with one operation of machine. The Rotap Sieve Shaker is simple and durably constructed and is run by a FHP motor. The running parts operate in oil. The machine is easily installed. No special foundation is required. Test Sieves are supplied at extra cost. A time switch from 0 to 60 minutes is provided.
