

Product Name :
Trommel (with three Prefixed Speeds)**Product Code :**
ALABS-A162-005**Description :****Trommel (with three Prefixed Speeds)**

Trommel or revolving screens consists of a cylindrical screen rotated about its axis. Simple Trommel may be arranged in series with oversize of the first passing to the second Trommel and the oversize of the second passing to the third, etc. They are quite efficient for coarse sizes. The inclination of Trommel varies depending on the nature of material to be processed.

The present Trommel is built with screens of different sizes throughout their length, the feed entering at the end of the finest screen. In this way it is possible to collect materials of different size range from a single Trommel. Drive to the central shaft is given through a motor coupled to reduction gearbox. Set-up is complete in all respect with guards, bins and control panel. A special arrangement to change the angle of inclination of the Trommel is made

Experimentation:

- Demonstration of Trommel.

- To study the effect of changing the angle of inclination

Utilities Required :

- Raw Material for Feed.
- Electric Supply : Single phase, 220 V AC, 0.5 kW.
- Floor Area 2 m x 1 m.
- Weighing Balance.

Technical Details :

TD in 200-mm, Length 750-mm (approx.)

Standard mesh size.

Drive from motor coupled to a Reduction Gearbox & 3 step pulley to get different RPM.

Feed hopper Capacity with arrangement to control feed.

Collection bin capacity.

Special arrangement for changing the angle of inclination.

Control panel Comprises of:

Standard make On/Off switch, Mains Indicator etc.

Instruction manual will be provided along with the Apparatus

A good quality painted rigid MS Structure is provided to support all the parts.
