

Product Name :
Acceleration Apparatus

Product Code :
ALABS-A179-028

Description :

Acceleration Apparatus

- Demonstrates that a force causes a mass to accelerate and hence verifies the relationship of acceleration and force. Determines the acceleration due to gravity and confirms Newton's Second Law of Motion.
- The unit consists of a trolley gliding on two rails attached to the base, trolley has removable masses.
- Acceleration is indicated by spark generator on an electro-sensitive paper strip.
- Weights and weight hanger provided.
- An instruction manual for student and lecturer provided.
- 1 Roll of spark sensitive paper.
- Tape measure supplied
