

Product Name :
Melting Point Apparatus**Product Code :**
ALABS-A18-087**Description :****Melting Point Apparatus**

- Accurate determination of Melting Points, Melting range, Boiling points & Flow points.
- Compact design with digital display of Temperature.
- Electronic controller for precise setting of Heating rate.
- Silicon Oil bath with built-in magnetic stirrer and highly sensitive Pt 100 temperature sensor.
- Glare free illuminator & large magnifier for strain free observation.
- Temperature range of the apparatus is from 2°C above room temperature to 300°C.
- Press button is provided which is to be pressed when the desired change is noticed in the sample under test.
- The temperature reached at that stage is then held on the readout, till the 'CLEAR' button is pressed.
