

Product Name :
Ice Flaker Machine**Product Code :**
ALABS-A26-007**Description :****Ice Flaker Machine**

This Incubator has stainless-steel physique and reentering door which assures an more straightforward accessibility to ice, and it is supplied with electromechanical keep an eye on software. Stainless-steel cupboard is correctly insulated the usage of top rate high quality insulation supplies. Inside & exterior is product of S.S, CFC free refrigerant. Furthermore, noise stage is <50db with one scoop.

Options :

- Fabricated out of top rate high quality uncooked supplies makes it tough and sturdy
- The tool is environment friendly in efficiency and provides correct outcomes
- On hand at prime charges available in the market.

Ice flaking incubator is a tool to retailer ice in biotechnology, genetic, microbiology and biochemistry laboratories the place prepared

made ice flakes are often required in day after day actions. In these laboratories samples are required to be saved in cool temperature within the means of transportation and such ice flake incubators present the power. Ice flaking incubator can assist to eliminate the job of paying for ice after which breaking it into small piece to satisfy the requirement of getting ice flakes. Ice flaking incubator makes small and tiny items of ice.

Specs :

With Computerized Keep
watch over Tool Air Cooled
Adaptation
Ice Output per 24 hours Kg.
Storage bin kg
Refrigerant
Vapour Weight Kg
Circuit Weight Kg
External Size
500 X 650 X 900 (L x P x H)
Dimension mm (H foot)
Ice manufacturing is calculated at ambient temperature 10 °C
& water temp.zero°C
