

Product Name :
Pascal Law Apparatus**Product Code :**
ALABS-A187-014**Description :****Pascal Law Apparatus**

A simple apparatus to demonstrate the Pascal's Law that pressure exerted by a liquid in an enclosed space is equal in all directions. Comprises a spherical glass bulb with its neck supported horizontally and is connected to a vertically mounted 50mL plastic syringe through a flexible rubber tubing. The holes in the glass bulb allow liquid filled in the syringe to be ejected with equal force from each of them on pushing down the plunger of syringe. Complete apparatus mounted on a stable plastic base.
