

Product Name :
Electrostatic Kit**Product Code :**
ALABS-A133-089**Description :****Electrostatic Kit**

A comprehensive kit, ideal for a group of students to investigate the concepts of electrostatics. Designed around dual-purpose electroscopes, which enables comparative measurements of the weak electrostatic fields apart from the qualitative aspect of electrostatic charges. The complete kit comprises • Electroscopes with disc electrode and hook electrode – 1 set • Metalized Polystyrene Spheres – 4 Nos. • Nylon Thread – 1 Reel • Electrophorus – 1 No. • Proof Plane – 1 No. • Wire Stirrup, for suspending strips – 1 No. • Aluminium Cans, 50x25mm (height x diameter) – 2 Nos. • Polythene Tiles 75mm square – 2 Nos. • Polythene Strip, 150x25mm – 1 No. • Woolen Cloth, 250mm square – 1 No. • Silk Cloth, 250mm square – 1 No. • Glass Rod, 10" – 1 No.
