

Product Name :
Electroscope In Circular Metal Case

Product Code :
ALABS-A133-090

Description :

Electroscope In Circular Metal Case

An annular metal ring frame of diameter about 125mm, carries an insulating bush at the top, which has circular metal disc electrode above it and a conducting metal strip on the underside. The smaller, lightweight metal strip is pivoted at the center of bigger strip to provide deflection with the charging of electrode. The metal frame also has an earthing terminal at one side. Complete assembly mounted on base.
