

**Product Name :**  
Funicular Polygon and Forces Apparatus**Product Code :**  
ALABS-A189-022**Description :****Funicular Polygon and Forces Apparatus**

- Effective teaching
- Self-contained, bench mounted
- Direct measurement of forces
- Adjustable lines of action of forces
- Practical verification of triangle of forces, polygon of forces and link polygon
- Demonstrates equilibrium of forces at a point, applied to various points round a disc or acting on a rectangular lamina
- Concurrent & Non-concurrent coplanar forces

**Experimental Capabilities:**

- To resolve by experiment any suitable system of static coplanar forces which may or may not be concurrent

- To verify graphically using:
  - a) triangle of forces for three concurrent coplanar forces
  - b) polygon of forces for more than three concurrent coplanar forces
  - c) link polygon for three or more non-concurrent coplanar forces
- To investigate (c) for either a disc or a rectangular shape
- To compare the accuracy of the experiment by comparing the experimental and graphical results
