

Product Name :
Dry, Rough and Lubricated Friction Apparatus

Product Code :
ALABS-A190-014

A large, light gray watermark of the ALTEC logo is centered in the background of the main content area.

Description :

Dry, Rough and Lubricated Friction Apparatus

- Wall or Frame Mounted apparatus
- To show the coefficient of different materials upon various disc surfaces.
- To determine the equilibrium of forces between the force of friction and normal force between contacting surfaces.
- 3 friction discs with various surfaces to experiment with: Dry, rough and lubricated.
- Break lever with 5 different materials and roller bearing that can be used on each friction disk.
- Sliding materials: Steel, brass, nylon, ferodo (break material) and rubber.
- Pulley, two hangers and cord provided.
- Oil supplied for lubrication testing.
- Operating and maintenance manual with instructions for testing of the unit and example results to compare with.
