

Product Name :
4-Stroke Petrol Engine**Product Code :**
ALABS-A47-086**Description :****4-Stroke Petrol Engine**

Represents a typical air cooled, side-valve four-stroke petrol engine with the operation of the valves clearly evident, cams being driven by a gear train from rear of the main crank. As with the two-stroke model, simulated spark plug uses a small lamp to indicate the firing point. Screw terminals are provided for connection to 3 Volts battery. Cross-section of carburettor is shown.
