

Product Name :
Nephron Diseases**Product Code :**
ALABS-A144-061**Description :****Nephron Diseases**

This 300X life size model consists of 2 renal corpuscle sections: the first one shows the anatomy of the healthy glomerulus, the second one describes the most important glomerular pathologies due to hypertension: afferent arteriole arteriosclerosis, changes of vascular calibre, endotheliocyte and the consequent increase of plasma proteins in the urine.
