

Product Name :
Heart Diseases Model

Product Code :
ALABS-A144-152

Description :

Heart Diseases Model

Normal heart anatomy; myocardial infarction heart demonstrating a partially healed, thinned, and discolored 5 infarcted area. Including a thrombus in the apex of the heart; and a heart demonstrating congestive heart failure as a result of hypertension. The left ventricle hypertrophy and the correspondingly enlarged and distorted shape of the heart is shown both internally and externally. All models are approximately 50% actual size.
