

Product Name :
Electronics Component Tester

Product Code :
ALABS-A53-012

Description :

Electronics Component Tester

It is the latest microcontroller based electronic components functional tester. It functionally tests a variety of electronic active components and linear ICs including diodes, zener diode, transistor, SCR, UJT, FET operational amplifiers, comparators, transistor arrays, optocouplers, analog switches, multiplexers, voltage followers, A to D converters, D to A converters, timers, VCO, PLL, waveform generators, voltage regulators, seven segment displays, relays & other selected special function analog ICS.

- No personality cards/reference IC/IC data required.
- Automatic testing of IC after entering the IC number. No wiring is required.
- Continuous mode of testing ICs until aborted. Number of times the test was successful is displayed.
- Step mode to locate the faulty pin. Step number and faulty pin number are displayed.

- Backspace clear select option and number keys for editing IC number.
- Remembers the IC number for repeated testing of same IC.
- Self test facility during power-on and through keyboard.
- Help key for short description of the various key function.
- Potential free 20 pin ZIF (Zero Insertion Force) socket for easy insertion and removal of ICs under test and component holder to hold components.
- Computer Interface through for enhancement of IC test library
- Buzzer to indicate bad IC.
