

Product Name :
The Earth in 3-D Student Book**Product Code :**
ALABS-A206-025**Description :****The Earth in 3-D Student Book**

This book is an effective visual introduction to geology. Aerial photographs of geologically significant locations have been digitally transformed into fascinating 3-D views. There are sixteen aerial images included in this 3-D book vividly illustrating dozens of landforms typically covered by earth science textbooks such as mesas, landslides, faults, dunes, and volcanoes. A description of the location and a series of study questions accompany each photograph. Two pairs of 3-D glasses are included with each book.
