

**Product Name :**  
Alpine Glacier Model

**Product Code :**  
ALABS-A206-032

**Description :**

**Alpine Glacier Model**

These models will give students the opportunity to observe the effects of glacial movement without having to endure glacial time. First model depicts a glacier in its active stage, while the second model shows post-glacial conditions. Using the second model, students can create their own glacier using ice and sand to observe glacial melting and deposition of glacial till. Each model is 18" x 24", formed in high impact plastic. Teacher's Guide Included. Alpine Glacier Model, Set/2
