

**Product Name :**  
Telescope Reflecting**Product Code :**  
ALABS-A79-033**Description :****Telescope Reflecting**

A high quality instrument with a resolving power of 1.5 seconds. The 100 mm (4 inch) diameter, 1000 mm focal length mirror gives relatively more light & less chromatic aberration than an equivalent refractor..

Magnifications of upto 250x are obtainable. The telescope has an equatorial mount with hour and declination circle & micro adjustments with flexible connections to avoid vibrations. The whole is mounted on a heavy 1.52 m tripod with an accessory tray. Supplied complete with two interchangeable eye lenses 6 mm & 20 mm, a 2x Barlow lens, sun filter, moon filter, a 5x24 star finder telescope (with mount on main telescope body), a solar aperture cap & an instruction booklet with space & moon maps
