

Product Name :
Semiconductor Diode Laser**Product Code :**
ALABS-A160-065**Description :****Semiconductor Diode Laser**

A solid state laser enclosed in a sheet metal case, produces a laser light beam of bandwidth 630 to 680nm. Provided with clips on the output window for mounting of optical accessories, as needed. Maximum output is rated at <math><1\text{mW}</math>. With 3-core mains lead and ON/OFF switch and fused input.
