

Product Name :
Work Done by a Variable Force, Tangential Effort

Product Code :
ALABS-A104-169

Description :

Work Done by a Variable Force, Tangential Effort

- Bench mounted
- Reinforces concepts of work and energy
- Direct reading of tangential effort
- Back board with protractor for angular measurement
- Pivoting lever with hanger and spring balance at one end
- Spring balance attached at 90°
- Instruction manual supplied

Experimental Capabilities:

- To obtain the experimental relationship between effort and distance moved by effort, and to compare with a theoretical prediction

- To show that the work done is the area under a graph of load against distance moved
