

Product Name :
Fibre-Optic Simplex Digital Transceiver Trainer

Product Code :
ALABS-A36-014

A large, light gray watermark of the ALTEC logo is centered in the background of the main content area.

Description :

Fibre-Optic Simplex Digital Transceiver Trainer

We hold expertise in designing and developing the best **Fiber-Optic Simplex Digital Transceiver Trainer**. Specifically designed for the study of characteristics & propagation delay in digital fiber optic transmission systems, these systems carries educative value for science & engineering students.

Object:

- Design & study of a fiber-optic digital link
- Study of rise-time and fall-time distortions
- Study of propagation delay

Features:

- The board consists of the following built-in parts

- Two isolated IC regulated D.C. power suppliers
- Timer IC for square wave frequency generator
- Three potentiometers to vary R (threshold resistance), R (input resistance) and frequency
- Fiber optic digital transmitter @ 660nm
- Fiber optic digital receiver
- Adequate no of other electronic components
- Mains on/off switch, fuse and jewel light
- The unit is operative on 230V $\pm 10\%$ at 50Hz A.C. mains
- Adequate no. of patch cords stackable 4mm spring loaded plug length $\frac{1}{2}$ meter
- Good Quality, reliable terminal/sockets are provided at appropriate places on panel for connections / observation of waveforms
- Strongly supported by detailed operating instructions, giving details of object, theory, design procedures, report suggestions and book references
- Weight: 3 Kg. (approx)
- Dimension: W 340 x H 110 x D 210
