

Product Name :
Infrared Thermometer**Product Code :**
ALABS-A104-368**Description :****Infrared Thermometer**

Designed using advanced thermal technology, these Infrared Thermometer are used to measure the amount of heat present in the measuring object by calculating the energy emitted from it. To ensure maximum accuracy in the result, the range is precisely manufactured using quality assure raw material and hi-tech machines by our vendors. Offered at cost effective prices, the range comes with following

Specifications:**Infrared Thermometer****Model****Function** MIN / MAX / MIN / MAX-MIN / AVG APO**Temperature Range** -30°C to 1022°F**Display Resolution****Accuracy** ±(2% reading) for -30°C to 100°C

±(2% reading)for 101°C to 550°C

Response Time**Detection Element****Spectral Response**

Optical Lens

Adjustable Emissivity ()

Field of View 60mm(2.4?ø at 24.0?)
