

Product Name :
Ships Stability Apparatus

Product Code :
ALABS-A104-516

Description :

Ships Stability Apparatus

- Apparatus designed to enable students to study ship hydrostatics and stability.
 - Supply includes a water tank, a floating ship model, a dynamometer and a clinometer.
 - The model supplied is a 1/70 scale model of a 28000 tonne general cargo vessel.
- It includes a number of transverse watertight bulkheads in representation positions.
- The compartments are fitted with individual flooding valves.
- The model is constructed of glass reinforced plastic (GRP).
- Models of other ships are available as optional accessories.
- The dynamometer measures the righting moment of the model.
- It holds the model

at any angle of heel within the range, with the model either free to trim or with heeling axis kept horizontal.

- It exerts no vertical force on the model.

- It is floor standing, with castors and is supplied complete with counterweights.

- Battery powered clinometer measures the inclination of the model, over the range of 0 to 45 degrees.
