

Product Name :
Mini Process Demonstrator**Product Code :**
EEATC007ALTEC™**Description :**

Instrumentation & control engineering are a vital part of any industry. These concepts are fully explored with process control applications. Mini Process Demonstrator IT-5205 explores the concepts and working of thermal process control which enables students to learn advance and more complex thermal process. IT-5205 has sensors like temperature sensor, liquid level sensor, level indicators. Additionally it has safety measures too such as emergency shutdown and over heat protector. There is a wide range of experiments that can be performed on the trainer.
