

Product Name :
DC Servo Control Trainer**Product Code :**
EEATC024**Description :**

Servo motors play a very important role in industry process. These servo motors can be DC or AC depending on the requirement. The DC servo trainer IT-4421 is a closed loop DC servo system designed in modular construction. The key concept behind this trainer system is to provide practical working knowledge of a closed loop DC servo system to the users by integrating basic theories and step-by-step experiments into one subject. To maximize the educational effectiveness, each section ends with a brief experiment to conclude what the user has learned in the experiment.
