

Product Name :
AC Servo Motor Trainer**Product Code :**
EEATC025ALTEC™**Description :**

Servo motors plays a very important role in industry process. These servo motor can be AC or depending on the requirement. IT-4420 contains a high speed, high functionality AC servo driver and motor. This driver can realize velocity response frequency of 1kHz and contribute to the development of a high-speed machine and drastic shortening of tact-time. Standard line-up includes full-closed control and auto-gain tuning function and the motors with 2500P/r incremental encoder and 17-bit absolute/incremental encoder.
