Product Name :

Universal Microcontroller Training System (AVR/PIC/8051)

Product Code :

EEATC056

Description :

is a basic Microcontroller Training System. This system contains on board devices like A/D converter, D/A converter, Dot Matrix Displays, Matrix keypad, 7-Segment, DIP switches and LEDs for monitoring and 840 tie point bread board for custom applications. Trainer contains the device programmer and device mounting option. This enables students to perform experiments on major microcontroller platforms namely AVR, PIC and 8051.
