Product Name :
Wave Propagation Trainer

Product Code :
EEATC092

Description :

Wave Propagation Trainer IT-8300 has been designed to act as basic tool for performing experiments in the field of Wave Optics System. This system is specially developed to provide an innovative approach to understand the Wave theory. The trainer comprises the fundamental passive and active monolithic microwave integrated circuit (MMIC) building blocks along with turn tables, reflectors and prism to perform the experiments like reflection, refraction, diffraction and polarization.
