

Product Name :
EPABX Trainer**Product Code :**
EEATC096ALTEC™**Description :**

Telephone exchange is serving mankind for decades. It is one of the best combinations of Analog, Digital & Mechanical circuits. The EPABX has undergone many phase of changes ever since its existence. EPABX trainer forms the basis of Analog telephone exchanges. Automatic switching can be performed and studied using real time waveforms. The functional blocks provides easy understanding of the working of the system. Visualizations of the switching and detections are explained with the help of software. A DTMF Telephone Trainer is also provided for better understanding of Telephony signals.
