

Product Name :
Whirling Hygrometer**Product Code :**
ALTECEDULABA0125**Description :****Whirling Hygrometer**

The ventilated type of hygrometer gives greater accuracy for humidity determinations and is particularly useful for measuring local difference in humidity. There are two thermometers mounted in case, one having wick dipping into a water reservoir at the end of the frame. The thermometers are stem engraved with lens fronts for easy reading. Range -5 to +50 degree C x 0.5 degree C in carrying cover.
