

Product Name :
Spectrum Analyzer

Product Code :
ALTECEDULABA0321

A large, light gray watermark of the ALTEC logo is centered in the background of the main content area.

Description :

Spectrum Analyzer

Spectrum Analyzer is used for the early test in the development of electrical products, troubleshooting of CATV/MATV system as well as the test and trouble diagnosis of cellular phone/paging system.

Frequency Range

4.5 Digit Display

Amplitude Range

Filters

AM/FM Demodulator

Full Range Built-in

Output Power

150KHz to 1000MHz

Center & Marker Frequency, 0.1MHz Resolution

-100dBm to +13dBm

20KHz, 250KHz & Video Filter

Included

0.15MHz to 1000MHz, Tracking Generator

+1dBm to -50dBm (50ohms)

Optional near field sniffer probe set to locate cable and PC board
Emission "Hot Spot, evaluate EMC problem at the breadboard and Prototype level. Ideal solution for RF leakage/radiation detection
