

Product Name :

Ray Optic Kit

Product Code :

ALTECEDULABA0351

**Description :****Ray Optic Kit**

A versatile kit of components for ray optics experiments. Investigations possible include linear propagation of light rays, focusing of rays by cylindrical lenses, focusing of multiple rays showing aberration, law of reflection, refraction in water, prisms etc.

Containing the following:

1. Lamp holder of 12V-24W lamp and stands - 2 Nos.
2. Housing shields - 1 Pair
3. Combined single and triple slit plate - 2 Nos.
4. Multiple slit combs - 2 Nos.
5. Holders for combs and slit plates - 2 Nos.
6. Wooden light barriers - 4 Nos.
7. Plano cylindrical lenses + 7D - 4 Nos.

8. Plano cylindrical lenses + 10D - 2 Nos.

9. Plano cylindrical lenses + 17D - 2 Nos.

10. Plano cylindrical lenses + 7D - 2 Nos
