Product Name :	**Product Code :**
Theorems Concepts Instruments For Maths Lab	ALABS-A7-003

Description :

Theorems Concepts Instruments For Maths Lab

Theorems Concepts Instruments for Maths Lab

Junior Pythagoras Theorem

To verify that in a right triangle square of the hypotenuse is equal
to the sum of the squares of other two sides. Provided with one plastic
right angle triangle with measure 3" x 4" and set of 3 side square equal
to the sides of triangle duly printed grid of each square inchs.

Senior Pythagoras Theorem Magnetic

Pythagoras theorem (Senior) provided in acrylic consist with 4 right
angle triangle and 1 big square. The overall size 16? x 16? in measure
having strong magnet at back to display on magnetic board for
demonstration.

Pythagoaros Theorem By Reverse Method

This manipulative is made up of foam and magnet at the back for demonstration purpose. This reverse pythagoras theorem is also called Bhaskra Charya proof
