

**Product Name :**  
Balance, Triple Beam**Product Code :**  
ALTECEDULABB0788**Description :****Balance, Triple Beam**

A single pan low form balance with three beams offers weighing capacity upto 610g, which can be further expanded to weigh upto 2610g when used with supplementary masses, with 0.1g readability and accurate and consistent readings. Additional masses are hung at the end of the beam increasing the capacity up to 2610g and can be stored in the recessed base when not needed to prevent them from slipping or falling. The balance features precision ground pivots and self aligning agate bearing to ensure reproducibility; easy zero adjustment that stays in set position; deep notched beams with center reading sliding poise to ensure correct positioning; effective magnetic damping coupled with appropriate beam capacity reduces oscillation, speeding the weighing process; and easy readability provided by high contrast markings, while reading device eliminates parallax for convenient determination of precise weight. The heavy cast metal base provides superior stability, making the balance difficult to tip over:
